Book\_Management\_fUser  
::returnBook

Library\_Database::setNumber

```
graph LR; A["Book_Management_fUser::barrowBook"] --> C["Library_Database::setNumber"]; B["Book_Management_fUser::returnBook"] --> C;
```

The diagram illustrates a dependency or call relationship. On the left, two white rectangular boxes represent functions from the `Book_Management_fUser` module: `barrowBook` and `returnBook`. On the right, a gray rectangular box represents a function from the `Library_Database` module: `setNumber`. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both `barrowBook` and `returnBook` call or depend on `setNumber`.
